

R&D Engineer CoC V-Clamps & Straps

Legnickie Pole, Poland

YOUR RESPONSIBILITIES

- Research and development of concepts and constructive solutions for new products in compliance with costs, deadlines and safety regulations.
- Define measurable criteria for product and process realization.
- Carry out feasibility studies to assess the possibilities and risks for achieving the project goals.
- Directly supervise the manufacturing process of sample parts.
- Initialization, creation and monitoring of the concept, product and process design phase supported by the R&D test department.
- Consolidation and evaluation of results from the basic and functional tests of the test department up to series production release.
- Definition of the requirements and specifications of the corresponding product solutions.
- Accompaniment of prototype production in connection with product and process development.
- Preparation of detail drawings, assembly drawings and production documents.
- Mechanical integrity calculations by means of state-of-the-art engineering tools.
- Supports the creation and updating of design and process FMEA's.

Join us and get ahead.

A position with the Oetiker Group, Swiss family-owned company, offers exciting global challenges and a whole range of development opportunities. Our unique company culture is built on a strong sense of trust where employees are encouraged to contribute from Day 1. We embrace our diversity and enhance it by being open to new approaches. We seek colleagues who share our customer centric mindset in delivering quality in everything that we do.

Does this sound like you? We look forward to hearing from you soon.

YOUR PROFILE

- 2+ years experience as R&D Engineer or equivalent role, preferably in automotive or in a high-mix/high-volume OEM environment.
- Experienced in 3D-CAD software, preferably in SolidWorks.
- Higher degree in Mechanical Engineering (BSc, MSc) combined with relevant work experience.
- Proven professional experience in the development of stamped, bent and welded parts is an advantage.
- Excellent oral and written communication and presentation skills in English.
- Experience in Quality Systems such as IATF 16949 and ISO 9001 is an advantage.
- Precise working style with a high commitment to quality.
- Proven analytical and engineering expertise (Design for Six Sigma, Finite Element Analysis).
- Good interpersonal skills with ability to communicate and negotiate effectively across all levels and all functions of the organisation.
- Ability to explain complex technical issues/solutions to a non-technical audience.

Oetiker provides customers with the peace of mind that their mission-critical components are reliably connected. We are a global leader in high-end connecting solutions for the vehicle industry and for high-value applications in industrial segments. Our expertise in high-quality clamps, rings, straps and quick-connectors ranges from powertrain and drivetrain applications to medical applications. With 1800+ employees in more than 25 countries and over 75 years of experience, we are the trusted, global, long-term partner for the world's leading OEMs.
