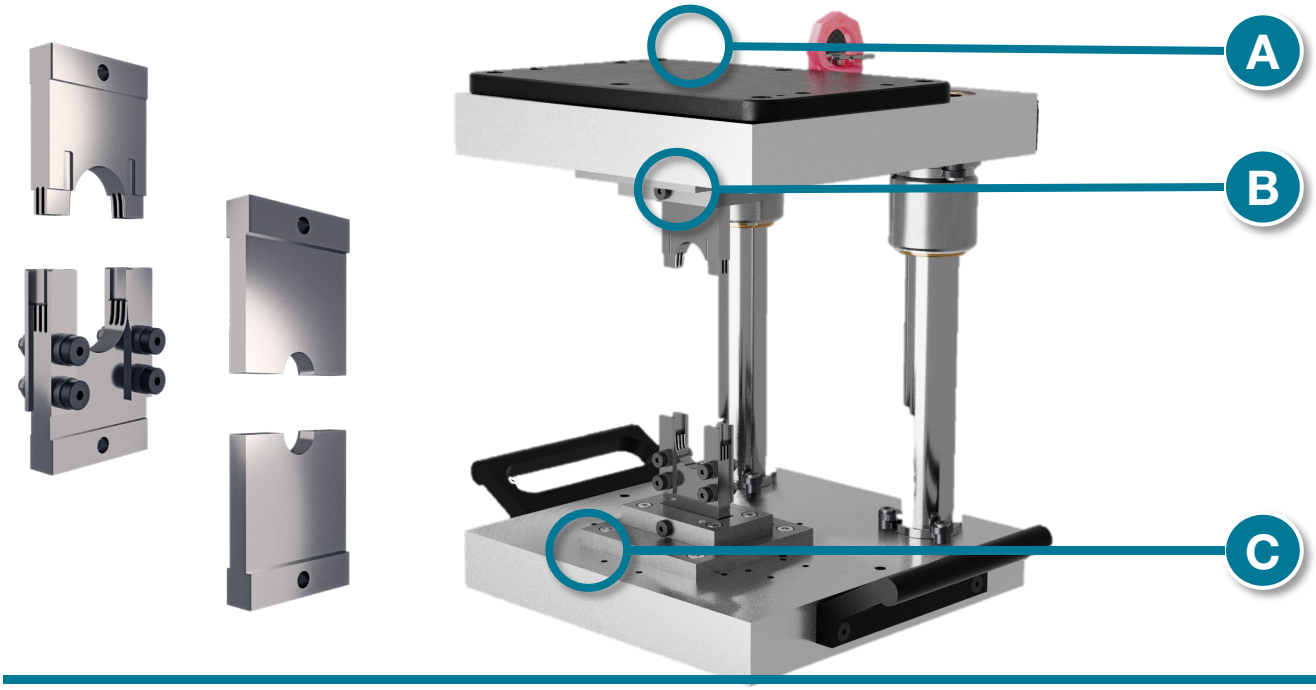
Oetiker OptiSwage® Two Jaw Platform

Crimp with Confidence

Reliable Connections

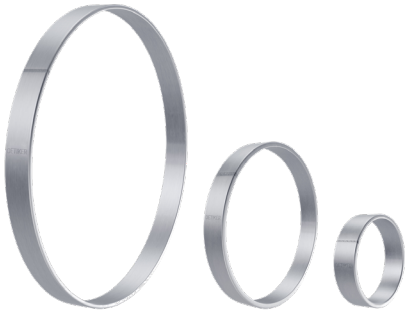


Benefits:

The Oetiker OptiSwage® Two-Jaw Platform, paired with EcoCrimp and ClassicCrimp jaws, seamlessly integrates into most pressing equipment to provide space saving and cost-efficient connections.

Features

- **A** Easy to integrate
- **B** Can close up to three Oetiker MCR per cycle
- **C** Low complexity and low maintenance



Available for a wide range of Oetiker MCRs

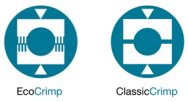
OETIKER OPTISWAGE® ASSEMBLY PORTFOLIO

OptiSwage® Two Jaw Platform

- Delivers high performing fluid line connections
- Ensures top-quality results while minimizing assembly cost, machine investment and needed assembly space
- Reliable design with few moving parts
- Allows for multiple ring closures at once
- Can be customized to close up to three Multi Crimp Rings at a time



EcoCrimp and ClassicCrimp Jaws

- Fully compatible with the OptiSwage® Two-Jaw Platform
- EcoCrimp: advanced design enables greater diameter reduction - ideal for use with Oetiker Multi Crimp Rings 250. This combination ensures a secure, tamper-proof closure, perfect for cooling system connections
- ClassicCrimp: cost-effective solution for precise swaging with less diameter reduction

OETIKER MULTI CRIMP RING PORTFOLIO

Multi Crimp Rings 250

Stainless steel
15.0 – 120.5 mm

- Large diameter range available
- Full material cross-section over 360°
- Flexible diameter reduction
- Low profile connection
- Ultimately robust and temper-resistant

Multi Crimp Rings 150

Stainless steel
5.0 – 50.0 mm

- Small diameters available
- Full material cross-section over 360°
- Flexible diameter reduction
- Low profile connection
- Ultimately robust and temper-resistant

OETIKER 360° SOLUTION APPROACH

A globally supported process

- We are committed to deliver the best suited connection, according to our customer's specific application.
- We support our customers at every stage from initial concept to a 100% connected solution using our full 360° solution approach.
